Testimony in Divorce Actions

Testimony was taken in special term of Supreme court Saturday before Judge Staley in an action for divorce brought by Louis Thiel of Shokan against Grace Thiel. The parties were married in 1902. Witnesses were sworn testifying that Mrs. Thiel had left her home and was now residing with another man as his wife and that they had one child. Mrs. Thiel, mother of the man with whom she now lived, testified that they had made their home with her for some time and were living together as man and wife. They had also resided on Smith avenue, this city, for a time. Walter J. Miller appeared for plaintiff.

In an action for divorce brought by Yvonne Van Valkenburgh of Kingston against her husband, Frank Van Valkenburgh, testimony was also taken. They were married in 1922 by a justice of the peace. Two witnesses were sworn who testified that Mr. Van Valkenburgh has boarded at the same place they resided and had there lived with a woman not Mrs. Van Valkenburgh whom they had never seen there. Frank W. Brooks appeared for Mrs. Van Valkenburgh.

RABBI ROSE PAYS HIGH TRIBUTE TO MARKS JACOBS.

At the funeral of Marks Jacobs, held Monday from his home on Abruzzo street, Rabbi Morris Rose of Temple Emanuel paid a fitting tribute to Mr. Jacobs. He said:

"This afternoon we are gathered to pay our last tribute to a cherished friend, a loyal and faithful member of our people and an upright citizen, whose character embodied every activity in which he was engaged.

"In his death we bid farewell to the last of that sturdy group of German Jews, who were the pioneers in this community to pave the way for others of our faith, to find Kingston a haven of refuge and a home where we were welcomed and respected because of the noble lives of these men and women.

"Marks Jacobs, whom we now mourn, was blessed with more than four score years, perfect health of body and mind and a very charming personality, which commanded the respect of all friends and neighbors with whom he came in contact.

"Everywhere he was looked up to and in every organization where he was a member he was placed in position of leadership and influence. The Masonic order, and the Temple Emanuel have always recognized his loyalty and executive ability and paid him every high honor.

"He was a man of a few words

NEW YORK AND LOS ANGELES BUS SERVICE

The first transcontinental bus service, leaving between New York and Los Angeles.

Organ Recital At New Paltz

On Wednesday evening, November 7, the Reformed Church of New Paltz will offer its first organ recital on its new Odell organ. W. W. Freedenburgh, organist of the First Reformed Church of Kingston, will be the guest player at that time. Mr. Oates of New Paltz, whose singing is always a pleasure, will be the soloist.

It is hoped to have a series of recitals during the winter months in order that everyone may have the pleasure of hearing the new organ that has been installed. It is a two manual and pedal organ with seventeen complete stops and the Organ Cathedral Chimes. The keyboard is equipped for the easy addition of a harp and vox humana at some later date. It also has the electro magnetic action which means that no wind is in the console. In addition to the seventeen stops, the organ has the full equipment of ten couplers, and adjustable combinations which the old organs lacked. There is a concave, radiating pedal keyboard with crescendo and swell pedals.

The instrument itself is enclosed by case work of dark quartered oak, surmounted by thirty-five display pipes in old gold color, making a very handsome appearance. The power is supplied by a centrifugal pump driven by a 1½ horse power electric motor which also operates the console of special design for the organ.

the First 1,000 Miles

There is one time in the career of nearly every motorist when he subconsciously is inclined to be a road hog. Unless he is aware of this temptation he is likely to make himself a general nuisance.

The time in question is right after the acquisition of a new car. Breaking-in the engine carefully requires driving slowly for the first 1,000 miles. Now, driving slowly is only one element of road-hoggishness, but it is the first one. The second, keeping in the middle of the road, is likely to be the product of inattention, or concentration on the operation of the machine in the case of the new car owner.

Therefore, he should keep a close check on what part of the highway he uses in putting the first 1,000 miles on his brand-new speedometer. Otherwise, he becomes a road hog.

Motorists Pay Big Road Tax Over Poor Highways

Motorists pay a bad roads tax equivalent to 22.3 cents on every gallon of gas consumed on a poor highway. The Chicago Motor club reports that this conclusion was drawn from experiments recently conducted in Washington, Iowa and North Carolina.

The figures were based on the premise of a car making 10 miles to the gallon on a rough highway. On a basis of a speed of 33 miles per hour, the test showed the cost of gasoline and tires per one thousand miles over rough roads used in the experiments was \$22.30 for an average four cylinder car weighing 3,200 pounds loaded. The cost for the same car at the same speed over a very smooth improved road was only \$12.50, according to the tests.

Passing Observation

As far as most of us are concerned, we wouldn't give a hang for some gift the power to give us to see ourselves as others see us if we could have one that would enable us to make others see us as we see ourselves.—Cincinnati Enquirer.

Color Seen as Factor in Reducing Accidents

A prominent safety engineer recently pointed to brilliant body colors as a means of reducing motor accidents. Bright colors, because they can be seen at much greater distances and attract attention much more readily, are an important factor in driving safety. Chromium plating which is found on all bright surfaces supplements the color factor of safety. The armored steel body adopted by Studebaker in 1925 as standard for its entire line has demonstrated the wisdom of Studebaker engineers repeatedly by withstanding crashes as only steel can.

AUTOMOBILE ITEMS

One thing the driver of a silver airplane will not have to worry about is a grade crossing.

"Don't test your brakes on the other fellow's car" is a slogan being circulated by a safety advocate.

An autoist is suing another for \$25,000 as a result of a collision of their machines. He is holding out his hand.

In view of the pronounced success of windshields of that type, there are expectations that something can be done eventually about a nonshattering top.

With most cars, particularly those equipped with a plate clutch, one may shift from first directly into high in standing with a normal load on smooth pavements.
